# WhatsApp Helper - Manual Installation Guide

Thank you for trying out **WhatsApp Helper**! Since the extension is still under review on the Chrome Web Store, you can manually install it by following the steps below.

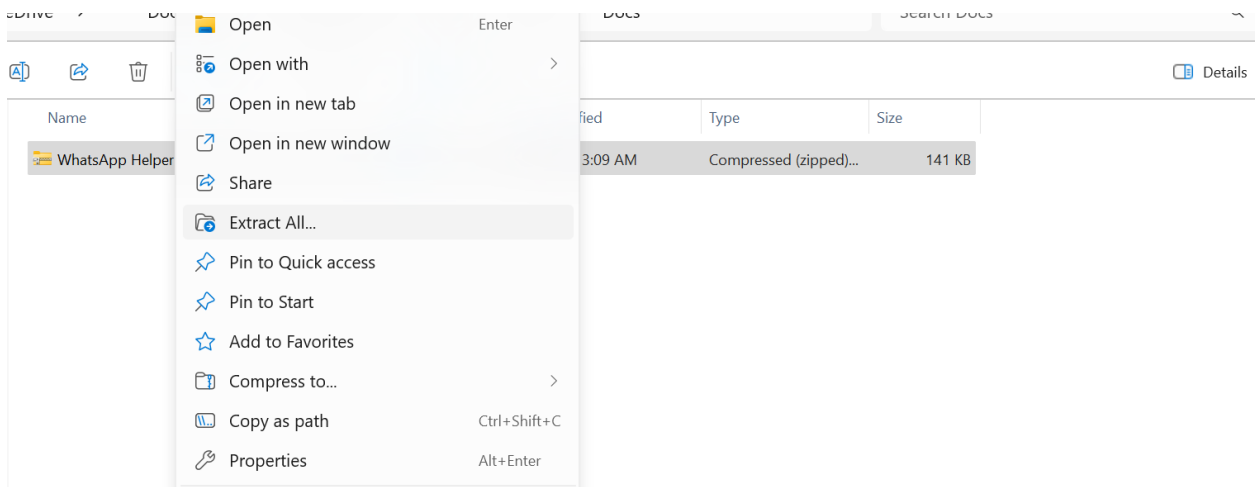

Step 1: Download the Extension Zip File

- Check your email or messaging platform where you receive the zip file.

- Download the zip file to your computer.

- The file will likely be saved in the **Downloads** folder by default.

Step 2: Extract the Zip File

- Locate the downloaded **WhatsApp Helper.zip** file.

- Right-click on the file and select **Extract All…**.

- Choose a location to extract the files (you can leave it as default) and click **Extract**.

← 📁 Extract Compressed (Zipped) Folders

Select a Destination and Extract Files

Files will be extracted to this folder:

| faricom Ethiopia\Documents\My-Projects\Cone\PoC\Docs\WhatsApp Helper | Browse... |

☑ Show extracted files when complete

- A new folder named **WhatsApp Helper** will appear with the extracted files.
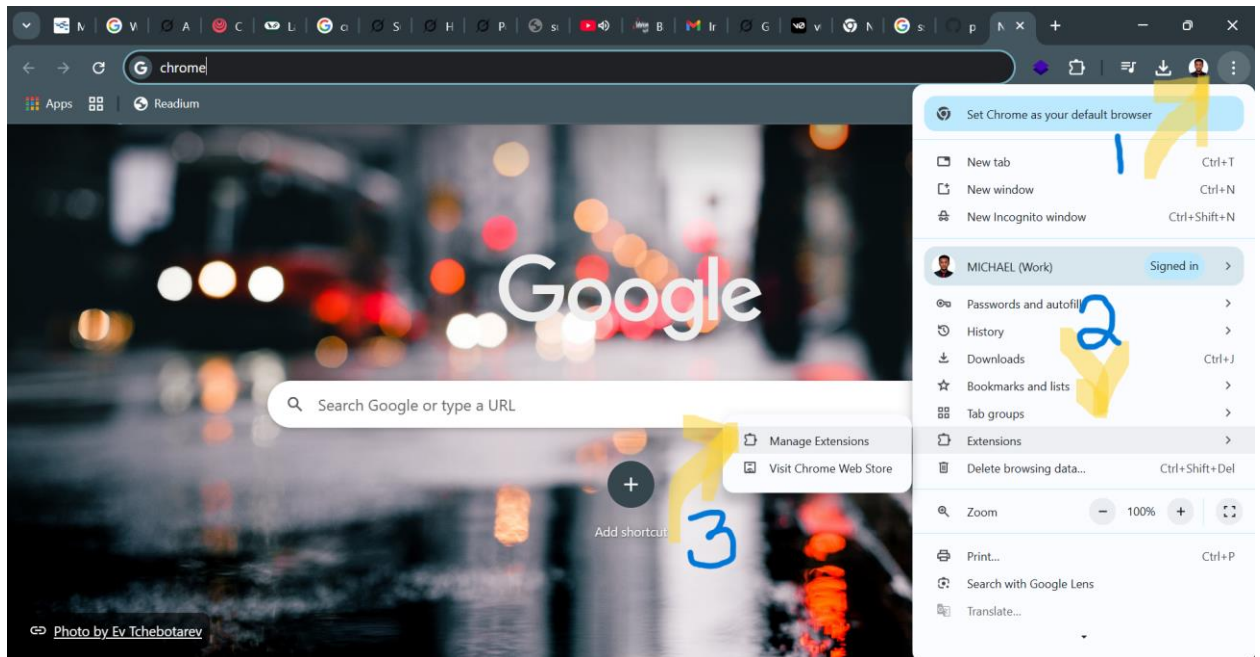

Name	Status	Date modified	Type	Size
📧 WhatsApp Helper	⊘	3/18/2025 3:09 AM	Compressed (zipped)...	141 KB
📁 WhatsApp Helper	⟳	3/18/2025 3:16 AM	File folder	

- Inside the **WhatsApp Helper** folder there is the chrome_plugin folder.

| Name	Status	Date modified	Type	Size
📁 chrome_plugin	⟳	3/18/2025 3:16 AM	File folder	

Step 3: Open Chrome Extensions Page

- Open **Google Chrome** on your computer.

- Click on the three-dot menu (burger menu) in the top-right corner of Chrome.

- Hover over **More tools**, then click **Extensions**.

- This will open the **Extensions** management page.

Step 4: Enable Developer Mode

- In the **Extensions** management page, look at the top-right corner.

- Turn on the switch for **Developer mode**.

Step 5: Load the Extension

- Click on the **Load unpacked** button at the top left.

- A window will appear asking you to select a folder.

- Navigate to the folder where you extracted the WhatsApp Helper extension and select the inner folder chrome_plugin.

- Select the extracted folder and click **Select Folder**.

Note: Don't forget to go inside the folder before clicking on the 'Select Folder' button.
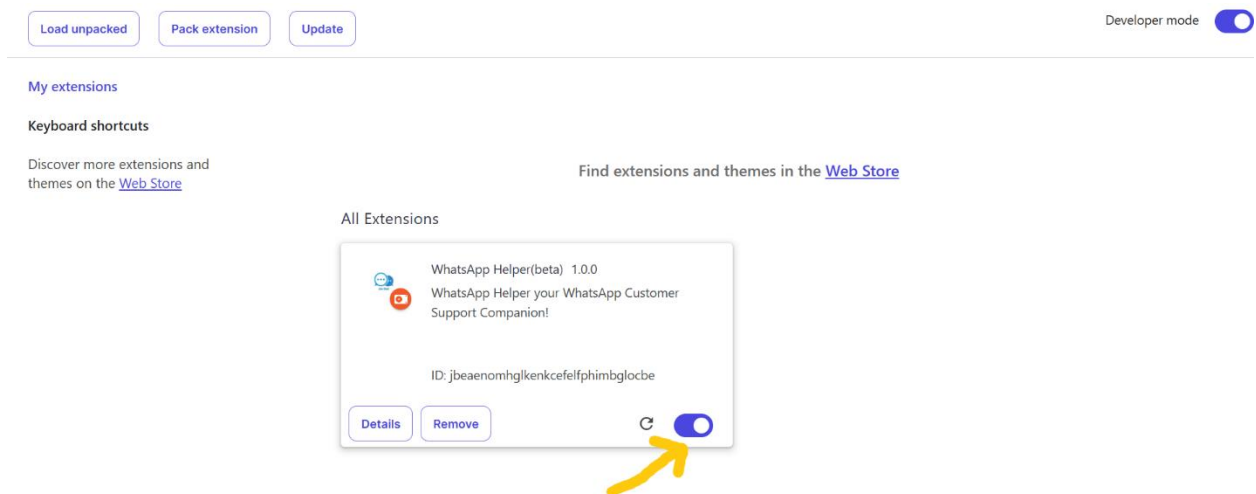

- The WhatsApp Helper extension should now appear in your list of extensions.

Step 6: Enable the Extension

- If the extension is not already enabled, find **WhatsApp Helper** in the list of extensions and turn on the switch.
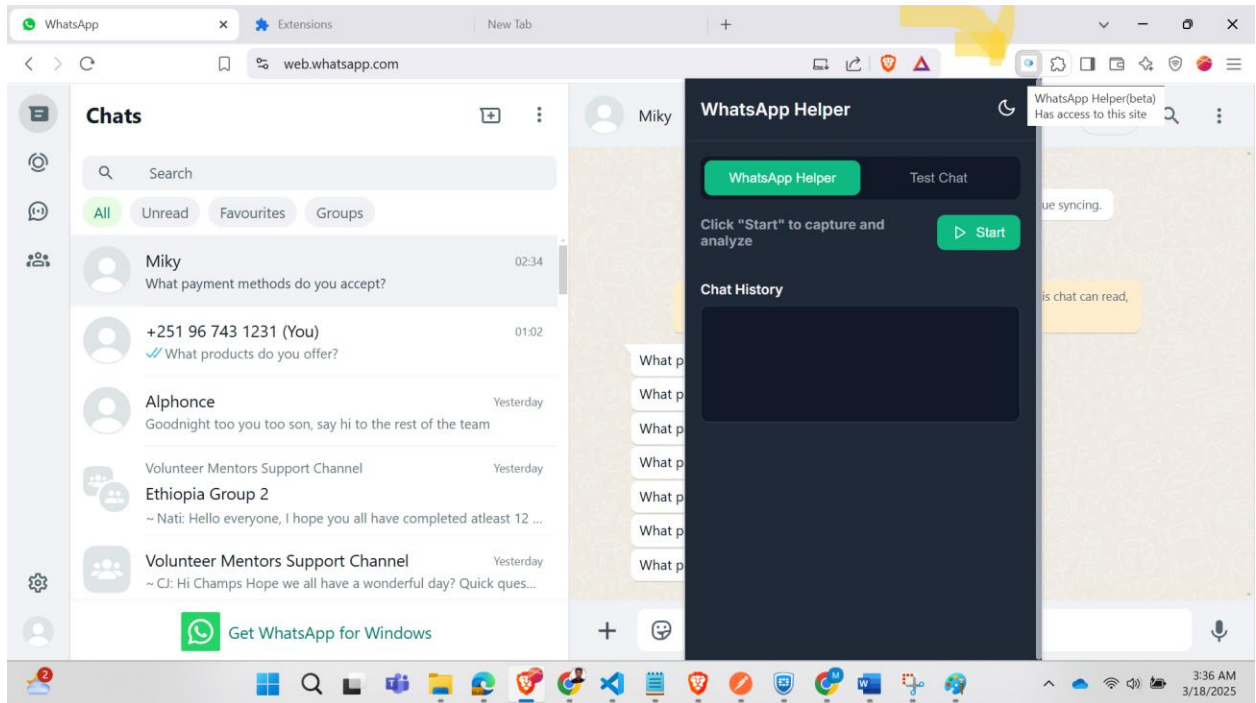

Note: Don't forget to enable the extension if it is not enabled as shown below.

- You should now see the WhatsApp Helper icon appear near the Chrome address bar.

Step 7: Start Using WhatsApp Helper

- Open the WhatsApp Page that you want to monitor and manage with the help of WhatsApp Helper on the other tab.

- Click on the WhatsApp Helper icon to open it and start using the features.

- If you encounter any issues, try refreshing WhatsApp Web or restarting Chrome.

Step 8: Choose the Flavor of WhatsApp Helper

- You can choose WhatsApp Helper and click on start if you have unread messages, and you want to monitor them automatically.

- You can choose Test Chat if you want to write and test the system by prompting it with questions like your customers.
